Date	03 October 2026
Team ID	SWTID-2026-6413
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	4 Marks

Project Design Phase

Solution Architecture

Solution Architecture:
Solution architecture is a complex process - with many sub-processes - that bridges the gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing business problems.
- Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.
- Define features, development phases, and solution requirements.
- Provide specifications according to which the solution is defined, managed, and delivered.

Example - Solution Architecture Diagram:

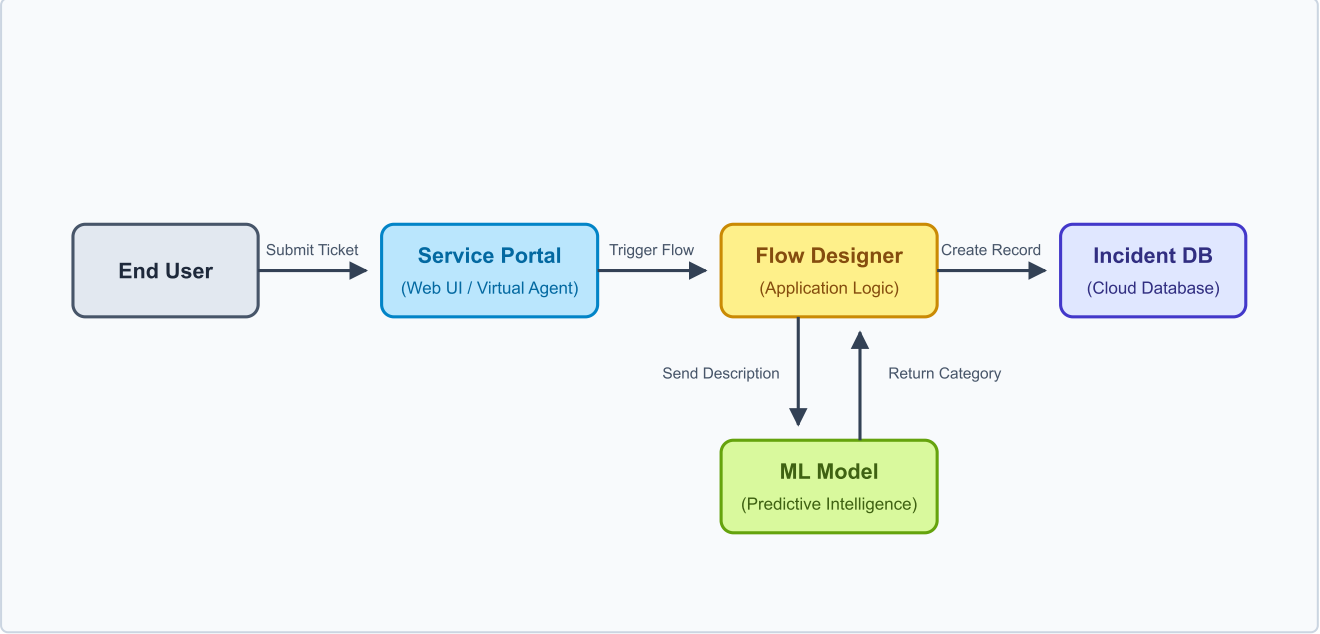

Figure 1: Architecture and data flow of the Auto Ticket Classification application
